

Quality Analyst

Description

We, at Bombardier Aerospace, are proud to build and support world-class aircraft such as regional airliners, business jets and amphibious aircraft that are in service around the globe.

We are team players who put people first in our efforts to succeed as an organization and to grow as individuals.

If, like us, you are passionate about winning and have a drive for results, Bombardier is the place for you.

In your role:

- You will be assigned to a specific work package and will be responsible to ensure that the supply base provide quality products by means of training, coaching and supporting suppliers to meet all BA requirements, monitoring the supplier's quality performance, perform root cause investigations, analyze corrective actions data, identify continuous improvement areas and establish the required initiatives.
- You will be expected to participate in various Integrated Product Development Teams (IPDT) where you will have to clearly understand the customers' needs and convey requirements in terms of the results and behaviors. You will be responsible for establishing and Deploying Advance Quality Planning at suppliers sites, improving business processes & solutions to ensure high quality of products provided by the suppliers.
- You will implement appropriate steps to ensure project completion in accordance with established objectives.
- Your ability to develop positive relationships with suppliers together with your role in the product auditing process will be vital to the quality of the product.
- Travel is required (20 - 40%) Short term

Qualification

The ideal candidate meets these requirements:

- Bachelor in Engineering/Science and 3-5 years' experience in Quality and/or Manufacturing or an equivalent combination of education and experience., preferably in Aerospace.
- The candidate must have the ability to work with minimum supervision, be a team player, self-motivated, and demonstrate initiative as well as leadership, and good interpersonal skills.
- Good oral and technical writing skills in English and French are required.
- Manufacturing and Assembly of Structural or System components with GD&T T (geometric dimension tolerance)
- Team leader, with good negotiating skills
- Project Management
- Knowledge of aviation regulations
- Knowledge of Advance Quality Planning (AQP) (Advanced quality planning) is a must
- Six Sigma Methodology, and Process Capability analysis, FMEA(failure mode and effet analysis), SPC (Statistics process control), MSA (measurement system analysis), & Problem Solving
- Various MS office applications

Does your vision of the future include the challenges that Bombardier can offer you? If so, come join our team!
